PRESENT COMMISSIONERS AND THE COUNTIES COMPRISING THEIR DISTRICTS:

First District

William "Bill" Saunders, Vice Chairman.....Johns Island, S.C.
Berkeley, Charleston, Dorchester, Georgetown and Horry

Second District

James B. Atkins.....Columbia, S.C.
All of Allendale, Barnwell, Hampton, Jasper and Lexington, as well as parts of Aiken, Beaufort, Calhoun, Colleton, Orangeburg and Richland

Third District

Randy Mitchell.....Saluda, S.C.
Abbeville, Aiken, Anderson, Edgefield, Greenwood, Laurens, McCormick, Oconee, Pickens, and Saluda

Fourth District

Philip T. Bradley, Chairman.....Greenville, S.C.
Greenville, Spartanburg, Union, and Laurens

Fifth District

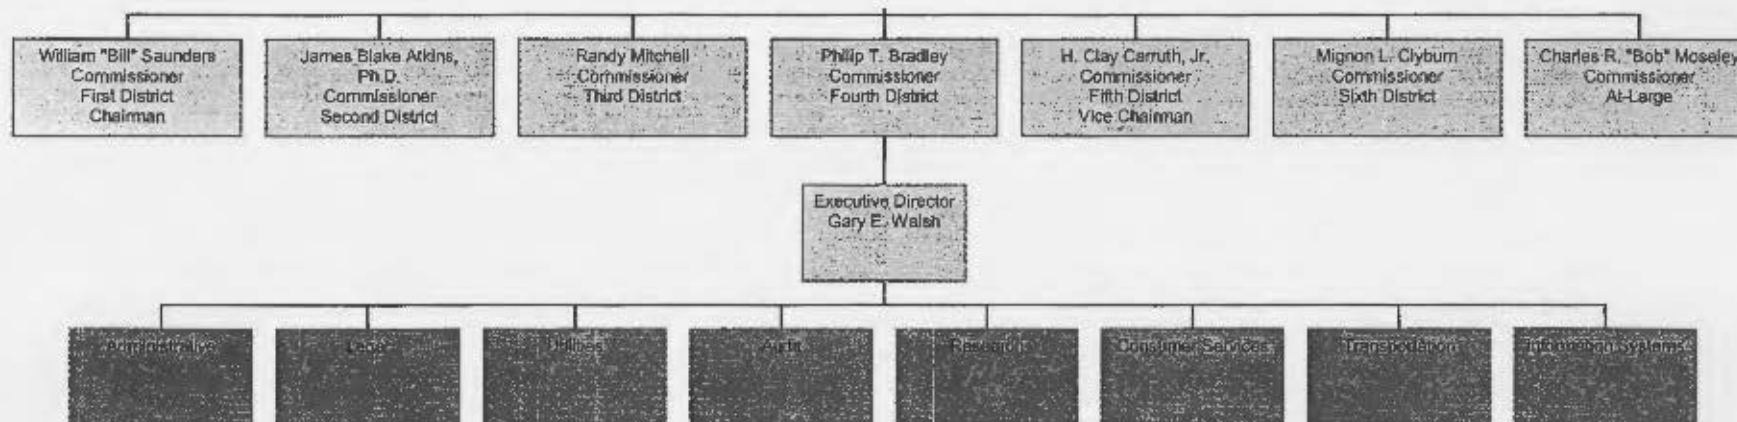

H. Clay Carruth, Jr.....Camden, S.C.
Cherokee, Chester, Chesterfield, Darlington, Dillon, Fairfield, Kershaw, Lancaster, Lee, Marlboro, Newberry, Sumter, and York

Sixth District

Mignon L. Clyburn.....Charleston, S.C.
All of Bamberg, Clarendon, Florence, Marion, and Williamsburg. Parts of Beaufort, Berkeley, Calhoun, Charleston, Colleton, Darlington, Dorchester, Lee, Orangeburg, Richland and Sumter

At Large

C. Robert "Bob" Moseley.....Irmo, S.C.
Statewide

KEY COMMISSION PERSONNEL

Listed below are the names and titles of the responsible Commission Staff members and key personnel:

Gary E. Walsh..... Executive Director

Jim WoodController

Carolyn C. Nelson.....Director, Personnel

F. David Butler.....General Counsel

William P. Blume.....Manager, Auditing Department

April B. Sharpe.....Manager, Consumer Services Department

Randy Erskine.....Manager, Information Systems

D. Wayne Burdett.....Manager, Utilities Department

R. Glenn Rhyne.....Manager, Research Department

George Parker.....Manager, Transportation Department

STATUTORY AUTHORITY OF
THE PUBLIC SERVICE COMMISSION OF SOUTH CAROLINA

Utility regulation in South Carolina had its beginning with the passage of an Act by the 1878 General Assembly, creating a Railroad Commission for the purpose of regulating railroads operating within the State. The first Commissioner was appointed December 24, 1878, by the then Governor Wade Hampton.

The General Assembly in 1910 established a Public Service Commission, empowering it with the authority to "fix and establish in all cities of the State rates and charges for the supply of water, gas or electricity furnished by any person, firm or corporation to such cities, the inhabitants thereof, and to prescribe penalties."

The 1922 General Assembly combined the two three-member commissions and added one additional commissioner to form the present seven-member commission. The name was changed in 1934 to the Public Service Commission.

The Commission is elected by the General Assembly for a term of four years, one from each of the six Commission Districts and one Commissioner at-large.

The Commission is composed of the Administrative, Auditing, Consumer Services, Information Systems, Legal, Research, Transportation, and Utilities Departments.

The Commission, as provided for by the South Carolina Constitution and as vested with power and jurisdiction by the South Carolina General Assembly, performs the following general functions:

1. Regulation and supervision of investor-owned electric utilities as to rates, charges, services, facilities, practices, accounting procedures, the purchase, sale and lease of utility property and the issuance of securities; and the administration of the Territorial Assignment Act relative to territorial boundaries. S.C. Code Ann., Section 58-27-10 et. seq., (1976), as amended; and Reg. 103-300, et. seq. Also the Utility Facility Siting and Environmental Protection Act (1971), S.C. Code Ann., Section 58-33-10, et seq.
2. Regulation and supervision of rates and charges, services, facilities, practices and accounting procedures of all intrastate investor-owned gas, street railway, water and sewerage companies; and the administration of the Gas Safety Act of 1970. S.C. Code Ann., Sections 58-5-10 et. seq. (1976), as amended; Reg.103-400 et. seq.; Reg. 103-500 et. seq.; Reg. 103-700 et. seq.
3. Regulation and supervision of rates and charges, services, facilities, practices and accounting procedures of all telephone companies within the State. S.C. Code Ann., Section 58-9-10 et. seq., (1976), as amended; Reg. 103-600 et. seq.
4. Regulation and supervision of services and practices of all radio common carriers within the State, except rates and entry, as per Order of the Federal Communications Commission. S.C. Code Ann., Sections 58-11-10 et. seq. (1976), as amended.

5. Regulation and supervision of for hire motor carriers of household goods, hazardous waste for disposal, and passengers relative to rates, schedules, rules, charges and facilities; issuance and supervision of the administration of Certificates of Public Convenience and Necessity, Fit, Willing, and Able, and Charter Bus. S.C. Code Ann., Sections 58-23-10 et. seq., (1976), as amended; Regs. 103-100, 103-200, et. seq.
6. Regulation and supervision of services and facilities of railroads and railways. S.C. Code Ann., Section 58-17-170 et. seq., (1976), as amended; as permitted by Federal Law.

SUMMARY OF ACTIVITIES DURING YEAR 1999-2000

During the past fiscal year, the Transportation Department dispensed license decals to 2,288 operating units varying in price from \$7.50 to \$50.00 each, according vehicle carrying capacity or empty weight. The various license decal fees assessed produced revenues of \$91,524.

As of December 31, 1999, 439 electric, gas, and telecommunications companies certified in South Carolina during this report period. A vast majority of the telecommunications carriers had no revenues or plant in our State but are still shown as operating in the State. Gross generated revenues by these companies totaled \$6 billion dollars. Total plant reported was \$16.5 billion.

Our records indicate that there were 64 water and wastewater companies operating in our State. The gross generated revenues of these companies totaled \$28.3 million dollars.

SUMMARY OF EXPENDITURES
EXPENDITURES

I. Administrative.....	3,274,851
II. Utilities.....	713,392
III. Transportation.....	866,652
IV. Employer Contributions.....	<u>872,911</u>
GRAND TOTAL (PUBLIC SERVICE COMMISSION)	\$5,727,806

The Public Service Commission hereby states that it did not purchase any energy conservation products that had not been certified by the State Energy Office.

I. ADMINISTRATIVE DEPARTMENT

The functions and responsibilities of the Administrative Department are as follows:

1. Maintains formal docket control which includes the receipt of all Petitions, docket matters that come before the Commission, notifies the public of such request, determines the time required to hear a matter, sets hearings on official calendar and notifies parties of record of hearing dates.
 2. Custodian of all official papers and records of the Commission and certifies same.
 3. Personnel - supervises and administers the personnel program of the Commission.
 4. Budget - supervises the planning and directs preparation of the budget submitted to the Budget and Control Board; supervises financial control of expenditures in accordance with fiscal appropriations.
 5. Purchasing - supervises the purchasing of all supplies and equipment, equipment inventory and the maintenance of records for the Commission.
 6. E.E.O.C. - acts for the Commission as liaison with the State Human Affairs Commission.
 7. Supervises Hearing Reporter of the Commission.

The Administrative Department docketed 497 matters that came before the Commission during the 1999-2000 fiscal year. Numerous filings, such as motions, petitions, and various requests, were posted to these dockets for the Commission's consideration. The hearing reporter transcribed the testimony and received evidence in the hearings held before the Commission, including performing her duties at the night hearings held so that the public may have the opportunity to express their views before the Commission. During the past fiscal year, the Commission processed 4,106 complaints; hearings were held thereon when necessary, and over 990 Orders were processed.

II. LEGAL DEPARTMENT

The Office of General Counsel performs the following functions:

- (a) Represents and appears for the people of the State and the Commission in all actions and proceedings involving any question of general and public interest within the jurisdiction of the Commission and, if directed to do so by the Commission, intervenes, if possible, in any action or proceeding in which any such question is involved;
- (b) Commences, prosecutes and expedites the final determination of all actions and proceedings directed or authorized by the Commission;
- (c) Advises the Commission Staff and each Commissioner, when so requested, in regard to all matters connected with powers and duties of the Commission and the members thereof;
- (d) Generally performs all duties and service as attorney to the Commission, which the Commission may require of it.

Attorneys in the Office of the General Counsel represented the Commission Staff in 183 hearings and Commission meetings before the Commission during the 1999-2000 fiscal year. These hearings and meetings involved both Utility Department and Transportation Department matters and included issues ranging from billing disputes to major rate increases to applications for certificates of public convenience and necessity. The Office of the General Counsel also participated in informal proceedings along with Commission Staff members and the interested parties for the purpose of resolving complaints or inquiries or for the purpose of gathering information in matters arising under the jurisdiction of the Commission. During the 1999-2000 fiscal year, the Office of the General Counsel had decisions rendered in appeals before the Circuit Court of South Carolina, the State Supreme Court, and the U.S. District Court. Several cases were pending before the Circuit Court and the Supreme Court.

111. AUDIT DEPARTMENT

The Audit Department is composed of two Assistant Audit Managers, six Auditors and one Accounting Fiscal Technician, all who report to the Audit Manager.

The Audit Department's primary function is to examine the books and records of Utility Companies which are either requesting a change in rates or being audited for compliance with Commission orders. A rate case examination or a compliance audit implements principles and procedures based upon regulatory laws and in this respect differs from audits done by a Company's public accountants. After their examination, the Audit Staff makes adjustments in the Company's operations to achieve a "normalized" test year. Staff's exhibits and testimony, if necessary, are directed toward the Company's operations and Staff's adjustments. Based on the Staff's audit report of the Company's operations, the Commissioners are then able to determine an equitable rate of return on the Company's investment, or an operating margin or compliance by the company with Commission orders.

The Audit Department audits also insures that proper cutoff of the test year are implemented as well as substantiating that revenues, expenses, and the rate base items are allocated according to proper jurisdiction. Employing the necessary procedures, the Audit Staff verifies the Utility's operations and verifies the books and records to the filings and its related exhibits.

With any audit, the Audit Staff places emphasis upon policies and procedures and the instructions thereto, as stated in the Chart of Accounts for the various types of regulated companies. The Chart of Accounts outlines which revenues, expenses, and asset accounts will be ultimately used to determine the company's rate of return on investment and/or operating margin.

After completing their examination, a report will be prepared by the Audit Staff which all necessary exhibits along with a written explanation of each of the exhibits. Copies of the Audit Staff's report are distributed to each Commissioner, the Company, any Intervenor, other members of the Commission Staff, and all other parties of record. Members of the Audit Staff maybe called upon to testify before the Commission and to submit the Report into evidence during hearings.

The Audit Department also reviews the changing prices attributable to fuel prices. Specifically electric companies, which utilize fuel adjustment clause and gas companies that use a purchased gas adjustment clause. The Audit Staff annually monitors fuel costs, performs audits, prepares reports and testimony. Such reports and testimony will become a part of formal hearings before the Commission and such reports and testimony will center on changes in fuel costs. Audits related to refunds from gas suppliers back to South Carolina jurisdictional ratepayers are also conducted by the Audit Staff.

The Audit Department also administers the Legislative order gross receipts tax, which is paid on an annual basis by the utility companies and regulated transportation carriers serving customers in South Carolina. These companies are required to report their revenues received within the State to the Commission. Tax assessments are based on these intrastate revenues.

The Audit Department is also responsible for administration and auditing of the Commission ordered Interim LEC Fund. The Fund was setup by the Commission in order to offset revenue losses that came about due to the Legislative law, which required the lowering of switch access charges in the State. All incumbent local exchange carriers were required by law to lower their switched accessed charges to equal or be less than the largest local exchange carrier operating in the State. Such major carrier was BellSouth. The Fund is presently been in effect for four years. Such Fund was setup to help the incumbent LEC's offset the loss of revenues which came about with the lower of switched access charges. Local exchange carriers are expected to gradually raise their local exchange rates in order to offset the revenue loss due to the lowering of the switched access charges.

The Audit Department has prepared tables showing Operating Revenues, Operating Expenses, Net Operating Income, State and Local Taxes Paid, and Gross Plant in Service for Electric and Gas Utilities for the years 1996-1999. Operating Revenues, Operating Expenses, Net Operating Income, and Gross Plant in Service are shown for Telephone Utilities for the year ending 1999. Operating Revenues, Operating Expenses, and Net Operating Income are shown for Water and Sewerage Utilities for the year 1999. Operating revenues and expenses are shown for Transportation Companies operating in South Carolina for the year 1999.

The Tables are as follows:

TABLE A-Privately Owned Electric Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For the Years Ended December 31, 1996-1999.

TABLE B- Privately Owned Gas Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For the Years Ended December 31, 1996-1999.

TABLE C-Communications Utilities Operating in South Carolina. Selected Statistics for South Carolina Operations. For the Year Ended December 31, 1999.

TABLE D-Water and Sewerage Utilities Operating in South Carolina. Selected Statistics for South Carolina for Fiscal and Calendar Year 1999.

TABLE E-Transportation Companies Operating in South Carolina. Selected Statistics for Fiscal and Calendar Year 1999.

IV. CONSUMER SERVICES DEPARTMENT

The Consumer Services Department's function is to respond to the public to address consumer complaints and inquiries concerning the utility and transportation companies regulated by the Commission. Utility customers may contact the Department by mail or through the Public Service Commission's local or toll-free telephone numbers listed respectively (803)896-5230 and (800)922-1531. Customers may also come to the Public Service Commission's Consumer Services Department's office in Columbia located in the Saluda Building at the Koger Executive Center to discuss utility and transportation related concerns. Consumer Services Investigators are available Monday through Friday, from 8:15 a.m. to 4:45 p.m. to respond to the public and investigate billing, service and other utility and transportation related issues. The department staff is also responsible for providing the public with Consumer Information and Education on utility related issues. To keep abreast of consumer issues and concerns, Consumer Services Department staff is represented on the National Association of Regulated Utility Commissioners (NARUC) Subcommittee on Consumer Affairs.

The Consumer Services Department was created in August 1991. The department's function is to work with the utility and transportation companies and their customers in an informal process to settle disputes and complaints and to advise the Commission and the public on evolving issues that may impact the public interest of the consumers in South Carolina. In addition to the investigation of consumer complaints, the department's investigators testify in complaint hearings and other consumer related hearings before the Commission, enforce the rules and regulations governing the utility and transportation companies regulated by the Commission, and assist in the development of regulatory policies. The Staff is also available for on-site inspections of the utilities facilities and to conduct water meter tests and witness electric and gas meter tests performed by the utilities.

Consumer information is available through the Commission's web site to help consumers know their rights and obligations as utility customers and to educate consumers about utility related issues. Through the Commission web site consumers can obtain information on How to File a Complaint, Utility Consumers Bill of Rights, Protection from Slamming and Cramming, Your Water and Wastewater Service, and Telecommunication programs for Lifeline and Link-Up for the low income. As utility industries change, the Consumer Services Department Staff will actively assist customers to make the connections between those changes and the effects they will have on consumer's daily lives. We plan to continue to increase the information about current issues to advance consumer education that will assist utility consumers to make better consumer decisions.

The Consumer Services Department provides an analysis of the complaint activity to monitor the utility and transportation companies' compliance with the Commission's rules and regulations governing the services provided to their customers. Consumer Services Staff records the public contacts received in the department into the Consumer

Tracking System (CTS) software designed to capture information from utility customers about the utility companies regulated by the Commission.

See Exhibits #1 – #17.

Total Consumer Contacts

The Consumer Services Department (CSD) staff recorded 9,471 public contacts during the fiscal year July 1, 1999 to June 30, 2000. These contacts are categorized by the type of utility industry, such as, telecommunications, electric, gas, water, sewer, or transportation. Consumer contacts made to the department that did not involve a regulated utility industry were categorized as miscellaneous. The types of consumer issues are categorized as complaint, inquiry, non-action, internal referral, or external referral. Of the 9,471 contacts received, 4,176 were consumer complaints that required staff investigation to gather facts and/or documents of evidence in order to make a determination for a resolution. There were 1,665 customer inquiries that, for the most part, required no follow-up investigation beyond the initial contact. Most of the inquiries involved requests for information that the CSD staff handled at the time of the initial contact, referrals to utility companies for initial action or referrals to other agencies. The 3,630 balance of recorded contacts were non-action, internal or external referrals.

See Exhibit #1, Industry Totals of Consumer Contacts and Exhibit #2, Contacts Listed By Industry.

Amount Recovered

The CSD staff helped South Carolina telephone, electric, gas, water and wastewater customers obtain **\$370,449.78** in credits or refunds during the 1999-2000 fiscal year period. The majority of the amount recovered was for telecommunications customers that totaled \$322,563.92. The amounts recovered for customers of the other utility industries were: \$40,529.26 for electric, \$4,979.08 for gas, \$989.52 for water, \$632.00 for sewer, and \$756.00 for transportation.

See Exhibit #3, Report of Amount Recovered.

Telecommunications Industry Consumer Contacts

In the **Telecommunications** industry there were **3,591** consumer contacts recorded. Of the total number of customer contacts for the telecommunications industry, 1,465 involved the incumbent local exchange companies (ILECs). The balance, 2,126, of the telecommunication's customer contacts involved the interexchange companies (IXCs), long distance resellers, and the competitive local exchanges companies (CLECs).

Of the 2,126 contacts that involved the IXCs, long distance resellers, and CLECs, 21% were from customers of MCIWorld, and 20% were from customers of AT&T. The majority of customer contacts involved billing. The two main categories of customer issues for IXCs were billing and slamming issues. Of MCIWorld's total customer contacts 61% were billing issues, and 17% involved slamming. Of AT&T's total customer contacts 71% were billing issues, and 9% involved slamming.

The majority of consumer contacts from the ILECs' customers involved the three largest ILECs: BellSouth, GTE (now known as Verizon), and United d/b/a Sprint. Of the 1,466 total customer contacts that involved ILECs, BellSouth's customer contacts accounted for 58%, GTE's customer contacts accounted for 17%, and Sprint's customer contacts accounted for 11%. The largest number of consumer contacts for ILECs involved billing and service. Of BellSouth's total customer contacts, 53% involved service issues and 22% involved billing issues. Of GTE's total customer contacts, 36% involved service issues, and 41% involved billing issues. Of Sprint's total customer contacts, 60% involved service, and 19% involved billing.

The CLEC with the largest number of customer contacts was Tri-Vergent f/k/a State Communications. Of Tri-Vergent's total customer contacts (this total includes customer contacts filed under the former name, State Communications), 45% involved billing issues and 30% involved service issue.

See Exhibit #4, Contacts Listed By Industry - File Type C, Exhibit #5, Summary Report By Category - File Type C, and Exhibit #6, Incumbent Local Exchange Companies.

Electric Industry Consumer Contacts

Consumer Contacts involving the **Electric** industry totaled **2,554**. The majority of the contacts recorded for the four electric utilities under our regulation involved billing issues, disconnection notices, payment arrangements, and service. The contacts from customers of CP&L, Duke Power, and SCE&G were 19% billing issues, 19% payment arrangement issues, and 10% service issues. 62% of Duke Power's total customer contacts involved disconnection notices due to the fact that Duke Power customers who received disconnection notices initially contacted the Commission rather than the company.

See Exhibit #7, Contacts Listed By Industry – File Type E, and Exhibit #8, Summary Report By Category – File Type E.

Gas Industry Consumer Contacts

Gas utility consumer contacts totaled **210** with billing leading the category of customer issues. In the gas industry, the majority of contacts were from Piedmont Natural Gas customers with issues involving billing, company notice, disconnection, and payment arrangements. SCE&G's gas customer contacts were largely billing and payment arrangements. Piedmont Natural Gas customer contacts accounted for 54% of the total gas industry contacts, and 31% came from SCE&G's gas customers. Of Piedmont Natural Gas customer contacts, 25% involved billing, 18% involved disconnection notices, 16% involved disconnection, and 16 % involved payment arrangements. Of SCE&G's gas customer contacts, 52% involved billing, 9% involved disconnection, and 17% involved payment arrangements.

See Exhibit #9, Contacts Listed By Industry – File Type G, and Exhibit #10, Summary Report By Category – File Type G.

Sewer Industry Consumer Contacts

Billing and service were the main categories for the 34 **Sewer** issues investigated. Customer contacts involving wastewater were filed against seven of the sewer companies regulated by the Commission. Carolina Water Service, Midland Utilities, and Palmetto Utilities customer contacts accounted for 53% of the sewer industry issues on billing and service. For the total contacts received involving these three companies, 44% were billing issues and 33% were service issues.

See Exhibit #13, Contacts Listed By Industry – File Type S, and Exhibit #14, Summary Report By Category – File Type S.

Transportation Industry Consumer Contacts

Transportation consumer contacts totaled **105**. In transportation, the consumer contacts involved fifty-five (55) transportation companies regulated by the Commission. The two companies with the most customer contacts involved SCE&G Buses with 6%, and CXS Railroad with 5%, followed by Allegiance Moving with 3%, Aparment Movers with 3%, and Two Men and A Truck with 3%. Service and regulatory issues involving passenger carriers and household goods movers were the main categories of consumer concerns received against transportation providers.

See Exhibit #15, Contacts Listed By Industry – File Type T, and Exhibit #16, Summary Report By Category – File Type T.

V. UTILITIES DEPARTMENT

The function of the Utilities Department of the Public Service Commission is to perform the necessary duties related to the regulation of utilities under the jurisdiction of the Commission. Management plans, coordinates, directs and supervises the work of the four areas as shown below:

Gas
Electric
Telecommunications
Water and Wastewater

Each area on the following pages of this report summarizes the activities of this Department for the fiscal year 1999-2000, affecting the various utility groups. 989 orders were issued through this Department during the fiscal year, and public hearings were held in connection with 184 of these orders.

A. GAS

There are four private corporate natural gas utilities serving customers in South Carolina. The rates and services of these utilities are subject to jurisdiction of the Public Service Commission. The natural gas utilities and the communities they serve are listed in the tables included in this report.

Natural gas brought into South Carolina is produced principally in the gas fields of Louisiana and Texas, including the offshore areas in the Gulf of Mexico. During the fall of 1978, our State started receiving gas from Algeria. Liquefied natural gas was transported from Algeria to a regasification plant and marine terminal located on Elba Island, which is near Savannah, Georgia. However, this plant operated by Southern Energy Company, presently is not receiving the shipments because the Algerian Government has terminated the contract for the supplies.

Gas is transported to South Carolina by two interstate pipeline companies: Transcontinental Gas Pipeline Company and Southern Natural Gas Company. Transcontinental's pipeline crosses the State in the northwest corner, passing just south of Anderson and Spartanburg, South Carolina, while Southern's pipeline enters and terminates in our State at a point near Aiken. All natural gas consumed in South Carolina is transported to the State by these two interstate pipelines which furnish gas to natural gas authorities, municipalities, and privately owned gas utilities.

The Federal Energy Regulatory Commission (FERC) has jurisdiction over rates and services of interstate pipeline companies and the price of natural gas sold and transported by interstate pipelines. These price fluctuations have a direct bearing on the cost for natural gas to the ultimate consumer in South Carolina.

Many communities in South Carolina are receiving natural gas through facilities owned by municipalities or gas authorities over which the Commission has no rate or service jurisdiction. However, the South Carolina Gas Safety Act of 1970 vested the Commission with pipeline safety jurisdiction over all gas system operators not subject to Federal Energy Regulatory Commission jurisdiction. Therefore, pipeline safety jurisdiction includes public utilities, municipalities, natural gas authorities, certain facilities operated by interstate companies, certain public housing authorities and others who purchase natural gas through a master meter for subsequent distribution to individual consumers, certain liquefied petroleum systems, and methane landfill facilities. As of June 30, 2000, the Commission's pipeline safety jurisdiction included a total of thirty-five (35) individual operators.

All four private gas utilities are operating under the provisions of curtailment plans designed to allocate gas on the basis of priority of service established by such factors as efficiency of use, safety considerations, consumer reliance, and alternate fuel availability.

Two factors showing the pace of activity by natural gas utilities are the average number of customers and the gross plant investment. The growth in total customers served by each privately owned gas utility is shown by one of the accompanying tables. The total of natural gas customers grew from 323,346 in 1994 to 366,674 in 1999 for an increase of 13.40% over the six years.

Rates were adjusted in accordance with approved purchased gas adjustment clauses that are designed to track changes in rates of interstate pipeline companies. Two companies adjusted rates during the winter period in accordance with a Weather Normalization Adjustment (WNA).

The Commission has issued Orders to all privately owned natural gas utilities, under the Commission's jurisdiction, establishing annual hearings to review the utilities' purchased gas adjustment procedures and gas purchasing policies. During this fiscal year the Commission completed these annual hearings for four (4) privately owned utilities.

Because of various changes in the regulatory policy at the federal level, the gas industry is going through considerable changes. The customers in our State are now permitted to purchase their own gas supplies and rely only on our gas utilities to transport the gas. The gas utilities also are permitted to secure their own system supply gas from sources other than the interstate pipelines.

FERC has issued Orders that have changed the function of interstate pipelines from a supplier to a transporter of gas. Recent Orders issued by FERC are designed to create a competitive, deregulated business in buying and selling gas on the interstate level. The local intrastate distributors will now have several different sources to secure their supplies from and the interstate pipelines will primarily only be used for transportation purposes.

In calendar year 1987 the Federal Energy Regulatory Commission (FERC) issued an order to the interstate pipelines whereby mechanisms were adopted for the recovery of buy-out and buy-down costs. These cost are associated with payments made by the interstate pipelines to producers to extinguish outstanding take-or-pay liability under existing contracts, or to reform the price, volume or the terms of the contracts. In the years following enactment of the Natural Gas Policy Act, interstate pipelines sought to obtain additional supplies, much of which were purchased under contracts incorporating substantial take-or-pay obligations. However at the same time gas prices were being driven up, demand for natural gas began to soften and the interstate pipelines began to incur take-or-pay obligations from the producers. Both interstate pipelines serving our State have begun to collect these charges from the natural gas distributors under the Commission's jurisdiction. The Commission has ruled that the gas distributors may recover the charges from their customers through their approved purchased gas recovery procedures.

B. ELECTRIC

The Utilities Department is responsible for providing the Commission with data and information necessary for the regulation of all privately-owned electric utilities operating in South Carolina. This regulation of the electric utilities is designed to provide adequate and reliable service at reasonable rates to the people of South Carolina while assuring that these utilities are provided an opportunity to earn a reasonable rate of return on the fair values of properties devoted to the public service.

AVAILABILITY OF ELECTRIC POWER

Carolina Power & Light Company(CP&L), Duke Power(Duke) and South Carolina Electric & Gas Company(SCE&G), the three major investor-owned electric utilities serving the State continue planning and building facilities and securing resources so that adequate electric power will be available for present customers and those who select to locate within the State.

Certain South Carolina preference customers are receiving power from the following Corps of Engineer Projects: Clarks Hill, Hartwell, and Richard B. Russell through transmission lines of the South Carolina Public Service Authority(Santee Cooper), Duke Power and South Carolina Electric & Gas Company. These Projects are included in the Southeastern Power Administration, also known as SEPA.

The VACAR Group of the Southeastern Electric Reliability Council is a group of electric utilities operating in Virginia, North Carolina and South Carolina and includes Carolina Power & Light Company, Duke Power, South Carolina Electric & Gas Company, South Carolina Public Service Authority, Virginia Power Company, as well as two smaller utilities (Yadkin and SEPA). This Council was formed to increase reliability of bulk electric power supply to the region and is one of the national groups which makes up several area councils. These companies exchange information on planning, construction, system loads and other matters affecting the bulk power supply within the area.

All three of the major investor-owned utilities in South Carolina are also purchasing power from small power producers and cogenerators as required by the Federal Energy Regulatory Commission under the Public Utility Regulatory Policies Act of 1978 (PURPA) to meet system loads.

Good planning and management has provided South Carolina with adequate and reliable electric power in the past and the organizations which generate and sell electric power in South Carolina continue to provide reliable power for the present and projected future requirements of the State.

GENERAL RATE CHANGES

The South Carolina electric consumer, after having enjoyed continually declining costs and rates from 1931 to 1969, experienced increases in rates beginning in 1970. The

increasing cost of money, construction, fuel and other items which go into the expense of providing electric service dictated the need for the Commission to grant increases to the utilities under its jurisdiction. These increases were designed to insure that the Utilities would be able to continue to provide adequate and reliable service while having the opportunity to recover the prudently incurred costs to serve the increasing demand.

Carolina Power & Light Company filed for an increase in February 1987 to cover a portion of the cost of the Harris Nuclear Plant and filed the companion request in March 1988. CP&L's last general rate increase occurred in August 1988.

Duke Power Company's last general rate increase was granted in November 1991 to include costs associated with the new Bad Creek Hydro facility. The Commission approved an overall rate decrease of approximately 6% effective June 1996 pursuant to decreasing buy-back power levels associated with the Catawba Nuclear Plant Sale Agreement.

South Carolina Electric & Gas Company filed an Application for a two-phase increase to be effective January of 1996 and 1997 to coincide with the commercial operation date and property tax liability of the coal-fired Cope Electric Generating Station, respectively. A determination was made in this matter in January 1996, resulting in a two-part increase totaling approximately 9% effective January 15, 1996 and January 1997, respectively. As part of its on-going regulatory responsibilities, the Commission ordered SCE&G to lower its rates by approximately 2% effective January 1999 after a finding that the Utility was earning in excess of its allowed return.

FUEL COST REVIEWS

In compliance with State statute, the Commission annually examines the fuel costs and plant operations for CP&L, Duke and SCE&G for prudence and minimization of total fuel costs. A public hearing is held for each Utility to establish a base fuel rate amount designed to recover the appropriate fuel expenses as determined by the Commission.

RATES

During 1999, the 982,055 residential customers in South Carolina served by the investor-owned electric utilities paid \$1,013,201,927 for 13,540,112,000 KWHs of electricity. The average South Carolina residential customer used 13,788 KWHs annually at an average cost of \$1,031.72 or 7.48 cents per KWH, a 1.51% decrease in usage, a 2.47% decrease in a total bill and a decrease of 1.06% in cost per KWH from 1998. In comparison, the average United States consumer paid 8.42 cents per KWH, a 3.33% decrease in cost per KWH from 1998 and 12.57% more per KWH than the average South Carolina residential ratepayer.

There were 174,295 commercial and small power customers of the investor-owned utilities who purchased 12,195,278,000 KWHs at an average rate of 6.12 cents per KWH, compared to the national average of 7.44 cents per KWH.

— The 3,863 industrial customers of the investor-owned utilities in South Carolina purchased 21,709,965,000 KWHs at an average rate of 3.86 cents per KWH, compared to the national average of 4.58 cents per KWH.

TERRITORIAL ASSIGNMENT ACT

The General Assembly passed the “Territorial Assignment Act” in 1969 and the Commission, pursuant to the Act has required all ‘electric suppliers’ to file maps with the Commission showing distribution electric lines in existence as of July 1, 1969. As of July 1, 1971, mylar maps of all counties in South Carolina had been filed with the Commission and negotiations between the ‘electric suppliers’ had begun.

Assignment of territory in most of South Carolina has been agreed upon by ‘electric suppliers’, except some areas left unassigned, and Orders approving the assignment of these areas have been issued by the Commission. Service rights and territorial issues continue to be heard and adjudicated by the Commission.

SITING ACT

The 1971 General Assembly passed an Act which gave the Commission authority over Siting by way of the “UTILITY FACILITY SITING AND ENVIRONMENTAL PROTECTION ACT” effective January 1, 1972.

The Commission continues to receive and process applications for Certificates under this Act from various parties including IOU’s, Qualifying Facilities (QF’s) under PURPA and Exempt Wholesale Generators (EWG’s).

The three major utilities provide the Commission with an annual report containing a minimum ten-year forecast of loads and resources including contemplated additional facilities and resources.

COMPETITION/RESTRUCTURING

The National Energy Policy Act of 1992 encouraged competition in the electric industry. As a result, The Federal Energy Regulatory Commission (FERC) sought to promote competition in the wholesale electric markets through the issuance of Order 888 on April 24, 1996. This Order required that all public utilities which own, control or operate facilities used for transmitting electric energy in interstate commerce, provide open access to these facilities on a non-discriminatory basis.

In December 1999, the FERC issued Order 2000 to encourage the voluntary formation of Regional Transmission Organizations (RTO’s). The Order requires transmission owners or operators to file their intent to be a part of an RTO by October 15, 2000. The stated intent was to provide for a more efficient wholesale power market. The Order directs that RTO’s be operational by December 15, 2001.

Electric restructuring in South Carolina continued to receive attention in both the House of Representatives and Senate throughout the 2000 Legislative session. Initial activity began when legislation was filed on the House side of the South Carolina General Assembly during the 1997 session addressing restructuring of the existing electric industry into a more competitive market.

The Public Service Commission of South Carolina continues to study, monitor and gather information from within South Carolina as well as throughout the country, in order to be in a position to provide knowledgeable insight and input on this complex, evolving process. As part of this process, the Commission, in August 1997, held an information gathering proceeding which provided a forum for interested persons and entities to present views on deregulation and restructuring of the electric industry in South Carolina. There were approximately thirty initial filings/inputs as a result of the public notice, followed by a comment period and the proceeding in August.

Most restructuring proposals contemplate customer choice of generation supplier while maintaining the basic status of the distribution system as it currently exists. In response to a Legislative request, and resulting from the fact gathering proceeding, the Commission submitted a PROPOSED ELECTRIC RESTRUCTURING IMPLEMENTATION PROCESS report to the South Carolina General Assembly on February 3, 1998. This document provided *only* a Process for implementing electric restructuring but did not address the fundamental question of 'whether restructuring in South Carolina is in the public interest?'. This question and several other major policy issues were recommended to be addressed and resolved by the General Assembly before proceeding with restructuring. The Report recognized South Carolina's enviable position in the areas of energy costs and economic development, and urged caution and careful consideration and deliberation as there may be little to gain and much to lose by being at the forefront of a restructuring movement. The Commission's PROPOSED ELECTRIC RESTRUCTURING IMPLEMENTATION PROCESS document may be accessed on the Commission's web page at <http://www.psc.state.sc.us/publications/pubs.htm>.

During the 1999 Legislative session, on the Senate side, The Task Force on Deregulation of South Carolina's Electric Industry was created under the direction of the Senate Judiciary Committee. The Task Force was formed to address regulations for the development of any electric utility deregulation legislation to be considered by the Senate. The Task Force has been divided into various subcommittees which meet on an on-going basis to discuss specific issues. The Subcommittees are: Subcommittee on Operations, Subcommittee on Financial Issues, Subcommittee on Consumer Issues, and the Subcommittee on Regulatory and Legal Issues. The Task Force's initial report was scheduled to be submitted to the Senate during the 2000 session.

In order to accomplish restructuring, it will likely require modifications of existing statutes, laws and regulations which will change the regulatory process and the manner in which electric utilities currently conduct operations in South Carolina. No South Carolina legislation had been finalized as of the end of the 2000 Legislative session pertaining to electric restructuring.

C. TELECOMMUNICATIONS

The Utilities Department is responsible for the work necessary for the regulation of rates, compliance with tariffs, and quality of service pertaining to twenty-seven (27) Incumbent Local Exchange Carriers (ILECs) and five hundred and seven (507) companies that are certificated to provide interexchange and basic long distance services.

During 1996, The Congress and the South Carolina General Assembly passed landmark legislation which has impacted the Commission and its Utilities Department. Congress enacted the 1996 Telecommunications Act. On a state basis, the Governor signed legislation, Act 354, on May 29, 1996. These two legislative changes set the groundwork for entry of competitors in the local telephone markets. New carriers, as allowed by law, are beginning to compete with the Incumbent Local Exchange Carriers (ILEC). As of June 30, 2000, the Commission has authorized one hundred and eighty nine (189) local competitive carriers. These new entrants are called Competitive Local Exchange Carriers (CLECs). The new laws set forth provisions which need to be addressed or accomplished before these carriers may begin their operations. Some of these provisions such as establishment of rates, terms and condition of interconnection of networks, and universal service issues, which require specific Commission action, have already been completed, or are currently under review.

To be able to better serve the needs of the customer, who expects better service without delays, equipment failures, or inaccurate billing, the Staff monitors the operations of all the jurisdictional telecommunications companies under the regulation of the Commission. These inspections and procedural evaluations are in the form of facilities inspections, cable tests, complaint visits, and compliance reviews pertaining to business office and other general operations of the Companies. Fifty-nine (59) compliance reviews were performed during the year to determine the condition of telecommunications networks, the quality of service being rendered, and compliance with the Commission regulation governing the operations of the telecommunications utilities.

The Staff maintains updated files regarding tariffs, Commission Orders, territorial maps, and other pertinent data. The Department was involved in one hundred and seventeen (117) formal hearings involving telecommunications companies. In addition, seven hundred seventy-three (773) tariff filings covering new services or revisions to existing services and rates were reviewed and processed by the Staff pursuant Commission regulatory policy.

The telecommunications companies have continued to make large investments to improve their central offices, outside plant, and toll equipment in an endeavor to cope with their constantly expanding and changing subscriber base and the subscribers' desires for new and innovative telecommunication services and competitive alternatives. The Staff has strived to stay abreast of the needs of the subscriber and the changing industry by maintaining a close working relationship with the Companies, other state and regulatory agencies in order to better serve all affected parties.

D. WATER AND WASTEWATER

The majority of water and wastewater utilities operating in the State of South Carolina are owned and operated by municipalities, counties, public water and sewer districts, public water and sewer authorities and Commission of Public Works. These utilities are exempt, by state statute, from jurisdiction of the Public Service Commission. As of June 30, 2000, there were 31 water companies, 22 wastewater companies and 22 combined water and wastewater companies regulated by the Public Service Commission of South Carolina.

There was three (3) new water utilities granted a Certificate of Public Convenience and Necessity during the fiscal year, and three (3) systems transferred to other utilities or utilities not regulated by this Commission.

More stringent demands by state and federal agencies, higher operating and maintenance costs, wages and supplies, caused four (4) water and wastewater companies, operating in this state, to apply to the Commission for authority to increase their rates and charges for water and wastewater service.

As prescribed by law and after proper advertisement, public hearings were held on each application for adjustments in water and wastewater rates and charges.

Prior to issuing a Certificate of Public Convenience and Necessity to a water and wastewater utility, the Commission, among other items, required a performance bond in accordance with Section §58-5-270 of the 1976 Code of Laws of South Carolina as amended, complete cost and rate data, approval of adequate design, and supply potential, plat of proposed service area and copy of engineering plans and specifications.

E. GAS PIPELINE SAFETY

In accordance with the South Carolina Gas Pipeline Safety Act of 1970 the Commission was given the authority to carry out and enforce safety regulations pertaining to gas pipelines. The Commission is certified with the Federal Office of Pipeline Safety (OPS) to carry out and enforce the provisions of the Federal Regulations For the Transportation of Gas By Pipeline. The Commission also signed an Agreement with the OPS whereby the Commission will serve as an agent of OPS and carry out safety inspection activities on intrastate liquid pipelines. At the end of calendar year 1999, the Commission's gas safety jurisdiction covered 2,300 1/4 miles of high pressure transmission pipeline, 75 miles of liquid pipelines, 15,511 miles of distribution main line, 580,462 service lines, and four (4) liquefied natural gas plants. The operators of these facilities include privately-owned utilities, municipalities, public works commissions, gas authorities, liquefied petroleum distributors, an interstate pipeline, US government, and land fill gas projects. During calendar year 1999, gas safety investigators spent 297 days inspecting gas facilities to ensure the operators' compliance with the regulations and to assist the operators in complying with the regulations and 33 days spent for on site training of Operators. No reportable gas related accidents occurred during the year.

VI. RESEARCH DEPARTMENT

The Research Department provides the Commission with specific data and economic and financial analyses necessary for the regulation of firms under the Commission's jurisdiction. The Department presents testimony and exhibits regarding the allowable rate of return on common equity for utilities, Universal Service, the compliance of Integrated Resource Plans with Commission orders and State statutes, the compliance of telecommunications tariffs with Commission orders, and alternative forms of regulation. Also, at various times, the Department provides energy and peak demand forecasts for electric utilities regulated by the Commission. The Department is active in assisting in the development of Commission policy regarding new and emerging issues in a dynamic regulatory environment. These issues include utility diversification, intraLATA toll competition in telecommunications, implementation of an intrastate universal service fund, developing an interim local exchange carrier fund, costing and pricing of services within a more competitive environment, Integrated Resource Planning, cross subsidization, electric industry restructuring, and compliance with State and Federal energy statutes. The Department is specifically involved in electric, natural gas, telecommunications, water and wastewater issues. The Department staff is on the National Association of Regulatory Utility Commissioners (NARUC) sub-committees on Electricity, Economics and Finance, Strategic Issues, Nuclear Issues/ Nuclear Waste, and Nuclear Strategy Coalition.

To properly carry out these responsibilities, the Department must seek to employ state-of-the-art financial and economic methodologies and techniques. The Department estimates the rate of return of a utility by relying on financial techniques such as the Discounted Cash Flow and the Capital Asset Pricing Model. Forecasts have been developed through the use of Econometric modeling techniques, including multiple regression and input/output models.

The Research Department also reviews proposals by the various regulated utilities pertaining to the issuance of long-term debt, preferred stock, common equity, and other forms of financing. In addition, quarterly reports are developed and provided by the Research Department to the Commission on the cost of equity for the major regulated utilities operating in South Carolina. These reports enable the Commission to monitor the impacts of changing economic and financial conditions on the risk and expected return of the utilities. The Department has testified more than eighty times since it was established in 1977. Since its creation, the Research Department has also been involved in administering management audits of certain utilities operating in South Carolina; and, administering various Federal grants from the Department of Energy.

The Department also monitors trends in overall economic indicators such as Gross National Product, Standard and Poor's 500 Market Index, interest rates, bond yields, and inflation rates. Regional and State economic conditions are also reviewed to provide a better understanding of the environment in which the regulated utilities operate in South Carolina. The Staff also prepares speeches for the Commissioners.

In 1994 the Research Department took on additional responsibilities. The Public Service Commission is now responsible for ESF-12 of the State Emergency Plan with the principal objective of restoring energy as soon as possible during emergencies. Briefly the responsibilities include an assessment of the extent of damage and cost to energy systems on a county basis, maintenance of energy damage and restoration status reports, coordination of emergency power fuel activities during immediate response operations, and coordination of restoration activities for electricity and fuel supplies to a normal level after an emergency. The Research Department is directing the Agency's emergency preparedness response team.

— The focus of the Research Department has also changed. While rate of return testimony is still significant, the Department is devoting much of its efforts to investigating emerging issues such as telecommunications deregulation, increasing competition in the electric and gas industries, regional transmission organizations, and nontraditional methods of regulation. The Department also meets periodically with the Commissioners to discuss the impacts of the issues on the utilities and ratepayers of South Carolina. Continuous and rapid changes in the utility environment will make the advisory function of the Research Department more important as the Commissioners strive to maintain proactive regulation and prevent being forced into reactive regulation.

Developing working relationships with other state agencies and external organizations has also become an important function of the Research Department. The Department has taken a leading role in developing task forces on water issues and consumer education for electric, gas, telephone, water and wastewater customers. Also, the Research Department has taken an active role in representing the Commission position and summary information on legislation concerning nuclear waste, telecommunication deregulation, and electric restructuring at both the State and federal level.

In FY 1999/2000 the Research Department made one presentations on electric restructuring to the House Committee on Labor, Commerce, and Industry; one presentation on electric restructuring to the Senate Committee on financial issues; one presentation of on electric restructuring to the Senate Task Force on consumer issues; and several presentation on water issues to outside organizations. Subcommittees on consumer education for electric, telephone, and water were set up consisting of persons from representing other state agencies and outside organizations. Joint meetings and separate meetings with these subcommittees were held to discuss ways to enhance consumer education. An education process was defined for the Consumer Education Committee. Educational brochures were developed for distribution for the public on "The Role of the PSC", "How to File A Complaint", "The Electric Industry", and "Why Does Water Cost". Water panel meetings were held in which members from the different organizations made presentations. Department staff represented the Commission on three Senate Subcommittees; prepared presentations on slamming, water issues, and consumer education and placed them on the Commission's website; attended ten conferences, workshops and seminars; evaluated five utility financing proposals; filed comments with the Federal Energy Regulatory Commission concerning regional transmission organizations; and participated in over one hundred twenty NARUC teleconferences. Research Department employees also participated in eight training exercises and workshops directed by the Emergency preparedness Office and worked at the state operations center during three hurricanes. The Department prepared a weekly report briefly describing current regulatory issues, which is distributed to the Commissioners and staff and quarterly estimates on return on equity for regulated utilities. Also, the Department assisted the State Energy Office in analyzing utility integrated resource plans and the preparation of a report on Demand Side Management.

VII. TRANSPORTATION DEPARTMENT

The functions of this Department are to enforce the Code of Laws of South Carolina, 1976, to include Chapter 23, Articles 1 through 17 as amended in the 1995 Cumulative Supplement (Volume 19) in conjunction with the Public Service Commission of South Carolina Transportation Department Rules and Regulations Pertaining To Motor Carriers (1999). The Transportation Department is responsible for the safe, effective form of regulation with regard to motor carriers of passengers, household goods and hazardous waste for disposal; promoting public safety by ensuring the safety of the State's railroad system, while focusing on the interests of the citizens, the employees and the motor carriers of South Carolina.

Effective January 1, 1995 the Federal Aviation Administration Authorization Act of 1994 pre-empted state regulation of the rates, routes and services of intrastate motor carriers of property other than household goods transporters and hazardous waste transporters. The Federal Aviation Administration Authorization Act of 1994 did not affect the intrastate regulation of passenger service. As a result of this pre-emption and due to further re-structuring within The Department of Public Safety, the Public Service Commission of South Carolina now issues Certificates of Public Convenience and Necessity and Certificates of Fit, Willing and Able based on the carrier filing an acceptable safety rating, proper rates where applicable and appropriate insurance forms.

The Public Service Commission also issues charter bus certificates to intrastate motor carriers after proving that they have met all insurance requirements of the Commission, and all safety requirements of the South Carolina Department of Public Safety.

The Transportation Department consists of the following four Sections:

- A. Licensing/Certificate Section
- B. Rates Section
- C. Law Enforcement Section
- D. Railroad Safety Section

A. LICENSING SECTION

The Licensing Section of the Transportation Department consists of the following three sections:

Certificate Section
Insurance Section
License Decal Section

1. CERTIFICATE SECTION

The responsibilities of the Certificate Section are to process all applications, to acquire new, to amend existing, to transfer, to suspend, or to cancel Certificates of Public Convenience and Necessity, Certificates of FWA and Charter Bus Certificates for the transportation of persons or property.

There are presently 692 intrastate motor carriers holding Certificates of Public Convenience and Necessity and /or FWA granted by the Commission, as follows:

CLASS	INTRASTATE CARRIERS	TYPE OF CARRIER
A	7	Common carrier transporting passengers over regular routes and on regular schedules.
B	1	Common carrier transporting passengers not over regular routes or on regular schedules.
C	659	Common carrier - taxicabs, limousines and charter buses - not operating over regular routes or on regular schedules.
E	126	Common carrier transporting property over irregular routes and on irregular schedules.
F	4	Contract carrier transporting Property over irregular routes

Notices of Filing, which must be published in newspapers of general coverage in the affected service areas, are prepared on Applications for Class A, Class E and Class F, for new authority and to transfer or amend existing authority. Notices of Filing were prepared on 19 Applications during this fiscal year and 21 public hearings were held, as indicated below:

HEARINGS HELD DURING 1999-2000 FISCAL YEAR

MATTERS HEARD	NO. OF HEARINGS	APPROVED	DENIED
Class A New Certificate	0	0	0
Class E New Certificate	10	10	0
Amended	1	1	0
All Classes Petition for Rule to Show Cause	6	6	0
Rules & Regulations	1	1	0
FISCAL YEAR TOTALS	18	18	0

Applications for Class A (Restricted) and Class C Certificates do not usually require Notices of Filing or Hearings. It is usual procedure for each of these Applications, after going through the acceptance process, to be presented to the Commission for a decision.

The Certificate Section processed and issued 352 Orders during the fiscal year. The Orders involved the issuance of Certificates of Public Convenience and Necessity, which are only issued after the motor carrier has filed all applicable insurance, rates, license decal fees and achieved a satisfactory safety rating.

There were 335 Certificates of Public Convenience and Necessity and Charter Bus Certificates processed during the fiscal year, as outlined below:

CERTIFICATES PROCESSED DURING

FISCAL YEAR 1999-2000

ALL CLASSES	YEAR TOTALS
NEW	192
AMENDED	33
TRANSFERRED	2
CANCELLED	106
SUSPENDED	1
REINSTATED	1
TOTAL CERTIFICATES PROCESSED	335

2. INSURANCE SECTION

The function of the Insurance Section is to maintain the insurance filings made by for-hire intrastate motor carriers and interstate motor carriers who base equipment in South Carolina. There are approximately 797 motor carriers who are required to file evidence of bodily injury and property damage liability insurance. Of these carriers, approximately 104 are required to file evidence of cargo insurance.

The Insurance Section maintains a suspense file for approximately 60 days on insurance filings for which an application is not pending. Upon receipt of an application, the filing is accepted.

The Insurance Section notifies regulated carriers of an impending thirty (30) day notice of cancellation of insurance and if no other coverage has been filed within that time limit, the motor carrier must cease operations on the date stated in such letter.

Prior to the issuance of a Certificate of Public Convenience and Necessity and the rendition of motor carrier service authorized therein, evidence of the required insurance must be on file with the Commission. Once licensed, motor carriers must keep insurance on file continuously. Motor carriers who fail to keep insurance on file are subject to having their Certificates revoked and canceled by the Commission.

3. LICENSE DECAL SECTION

Motor Carriers operating within the State of South Carolina on an intrastate basis and carriers based in South Carolina operating on an interstate basis are required to purchase license decals based on vehicle carrying capacity or empty weight, ranging in price from \$7.50 to \$50.00 semi-annually. These license decals are evidence of the motor carrier's compliance with the Motor Vehicle Carrier Law.

PUBLIC SERVICE COMMISSION LICENSE DECALS ISSUED BY CLASS:

CLASS A LICENSE.....	24
CLASS B LICENSE.....	0
CLASS C LICENSE.....	2,264
TOTAL LICENSE DECALS ISSUED.....	2,288

TOTAL LICENSE DECAL FEES (NET)..... \$100,402.18

B. RATES SECTION

Effective January 1, 1995 The Federal Aviation Administration Authorization Act of 1994 pre-empted state regulation of rates, routes and services of intrastate motor carriers of property other than household goods transporters and hazardous waste transporters.

The Transportation Department has one Auditor IV/Rate Analyst on staff. One of the primary duties of this person has been to perform on site compliance audits and desk audits. These audits offer support for pending rate cases as well as enforcement investigations. For the fiscal year 1999-2000 there were 11 rate increase audits and 8 complaint audits performed.

As a result of Deregulation of general commodities transporters and with the abolishment of the South Carolina Motor Truck Rate Bureau, the South Carolina Tariff Bureau Inc. was formed in March of 1995 as a statewide bureau offering joint and local rates applying on household goods. The Commission also recognizes individual tariffs.

C. LAW ENFORCEMENT SECTION

The enforcement of the Motor Vehicle Carrier Laws of the State, Sections 58-23-10 through 58-23-1830 of The South Carolina Code of Laws, 1976, as amended in the 1997 Cumulative Supplement (Volume 19) is carried out by the staff of nine inspectors stationed throughout the state. Tools used in enforcement include random vehicle inspections, investigations and inspections stemming from complaints and audits performed in the field. During fiscal year 1999-2000 these inspectors in conjunction with staff investigations made a total of 99 arrests totaling \$27,265 in fines.

All of the inspectors are commissioned by the South Carolina Law Enforcement Division and are entitled Law Enforcement Officers II. All officers wear uniforms and patrol in marked and unmarked cars with two-way radios and cellular phone communication with the Commission and each other. Their duties and responsibilities are to insure that the motor carriers under the jurisdiction of the Public Service Commission of South Carolina comply with the South Carolina Motor Vehicle Carrier Law and the Commission's Rules and Regulations Pertaining To Motor Carriers. The inspectors investigate violations, issue citations and warrants of arrests, initiate legal proceedings for violations and work with the regulated carriers and with the public helping them to comply with the laws.

INSPECTIONS: For fiscal year 1999-2000 the nine inspectors performed 4499 inspections. Some inspections were random roadside while others were complaint generated.

PUBLIC RELATIONS WORK: Inspectors recorded 387 assists to regulated carriers and the general public with regard to various motor carrier issues.

COMPLAINT RESPONSES: During the period inspectors, along with staff, answered and investigated 168 complaints.

COURT DUTY: Inspectors and/or staff attended or visited various magistrates and central traffic courts 114 times during the fiscal year 1999-2000. Some of these visits were scheduled court appearances while other visits were made to gather necessary information to make cases.

CITATIONS: Inspectors issued or took out 99 citations/warrants for the reporting period totaling \$27,265.

WARNINGS: Inspectors issued 49 warnings during the reporting period. Most warnings were issued to passenger carriers for decal violations.

EDUCATION: During the fiscal year 1999-2000 inspectors and staff attended 84 education sessions. The majority of these sessions were for officer re-certification such as firearm and driver training. The officers are also required to receive legal and core course updates each year.

INVESTIGATIONS: Inspectors and staff reported 48 different investigation activities. These investigations were performed to support various cases made against carriers during the reporting period.

COMPARATIVE ARREST REPORT

Fiscal Year	Arrests	Fines
1995-96	23	\$ 19,425.00
1996-97	80	\$ 59,800.00
1997-98	86	\$ 17,530.00
1998-99	106	\$21,288.00
1999-00	99	\$27,265.00

D. RAILROAD SAFETY

The Commission's Railroad Safety Program was as certified by the Federal Railroad Administration in 1980 pursuant to the Federal Railroad Safety Act of 1970. For the period, July 1999 through June 2000, inspectors spent 251 days making inspections of railroad equipment and facilities. Inspectors made inspections of 3,760 rail cars, 179 locomotive inspections, 3,001 record inspections, observed 41 train air brake tests and single car tests, performed 109 blue signal inspections and 45 roadway worker inspections. Track inspections totaled 1,252 miles of track, of which 69 miles were visually inspected on foot. The number of track inspections was low due to the fact that the Commission's only track inspector was undergoing certification training by the Federal Railroad Administration for seven (7) months during the period covered in this report.

Inspections of accidents and derailments were also conducted to determine probable causes and investigations were made in response to complaints from the general public.

RAILROAD COMPANIES OPERATING IN SOUTH CAROLINA

Year Ending June 30, 2000

<u>Line Haul Companies</u>	<u>Principal Officers</u>
CSX Transportation, Inc. Jacksonville, Florida	Ms. R. D. Rysdahl Vice President, S & E
Norfolk Southern Combined Railroad Subsidiaries	W. E. Honeycutt, Assistant Vice President
East Cooper & Berkeley RR Co. Port Royal Railroad Port Terminal Railroad of SC Port Utilities Commission of Charleston, SC Charleston, South Carolina	Eugene B. Way V.P. of Operations
Hampton & Branchville RR Co. Hampton, South Carolina	Norris L. Laffitte General Manager
Lancaster & Chester Railway Co. Lancaster, South Carolina	Norman Causey Vice president
Pee Dee River Railway (Aberdeen & Rockfish Railroad)	Edward R. Lewis President
Pickens Railroad Company Pickens, South Carolina	Donald Sims General Manager
South Carolina Central Railroad Company Hartsville, South Carolina	Lamont Jones General Manager
Carolina Piedmont Division Laurens, South Carolina	Lamont Jones General Manager
Carolina Southern Conway, South Carolina	Ken Pippin General Manager
